or a member of your region's steering committee (listed on last page).

About the symposium series

- The purpose of the microgrid symposiums is to exchange information internationally yet informally on the current state of research on microgrids, and to identify key technical, economic, and policy issues that should be addressed by future work.
- It is a by-invitation-only technical forum for a strictly limited number of eminent microgrid researchers.
- The prior seven symposiums have been held in:
  - Berkeley, U.S.A., on 17 June 2005
  - Mont-Tremblant, Canada, on 23 June 2006
  - Nagoya, Japan, on 6 April 2007
  - Kythnos Island, Greece, on 2 June 2008
  - San Diego, U.S.A., on 17 & 18 September 2009
  - Vancouver, Canada. on 21 & 22 July 2010, and
  - Jeju Island, Korea, on 26 & 27 May 2011.
- Our goal for the Évora 2012 Symposium on Microgrids will be to continue our examination of results from microgrid research and demonstrations in progress around the world with an emphasis on recent results.

Évora format

- follows the Paris *CIGRÉ Session 2012 (26 – 31 August)*
- two days of technical presentations and discussions (3 – 4 September)
- concurrent microgrid poster session
- optional technical tour to the Évora InovGrid/ InovCity pilot site organized by EDP Distribution (5 September)

Benefits of sponsorship

Company sponsorships typically range from US$2,500 to US$10,000. In exchange for sponsorship:

- table available for company literature, brochures, etc
- company logo on printed materials, size approximately corresponding to sponsorship amount
- sponsorships can be directed to specific Symposium expenses
- invited attendees are recognized experts in the field, and sponsoring companies are invited to send additional representatives
